

## Dear Colleagues,

*“Turkiye Klinikleri Gynecology and Obstetrics” journal which had been published since 1991, now has new vision, new targets and new name as “Journal of Clinical Obstetrics & Gynecology”. We are glad to present the second issue to our precious readers under this name. We are working hard to achieve further targets with the success of the first issue and the positive feedback we have received from you. I appreciate to the all valuable colleagues on the editorial board for their dedication. During this period, we applied to enter the PubMed and "Emerging Sources Citation Index" indices. I hope that in a very short time I will share good news with you in the forthcoming issues. I would like to point out that we decided to include original research articles and systematic reviews more in the forthcoming issues, and we will also evaluate articles that shed light on current health problems. In this context, we have included a comprehensive review about bariatric surgery method which is increasing rapidly in our country and its effects on infertility in this issue. We have also included "Consensus Report for Workshop on Early Diagnosis and Intervention in Cerebral Palsy: Turkey's Approach to Babies At Risk and Suggestions" which closely interests all of us. We have included two different and comprehensive ectopic pregnancy studies conducted for 6-7 years in two seperate clinics in Turkey. By publishing these two scientific studies which are among the biggest studies made in our country in this important matter, we would like to present with scientific evidence how the ectopic pregnancy outcomes and management in Turkey has been changed according to years.*

*We are looking for your valuable support and valuable papers to our journal.*

**Çağrı Gülümser, MD**  
Editor in Chief
